DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Raymond Diperna (Attorney on Record) on April 19, 2005.

The application has been amended as follows:

Claims 27 and 28 are amended in order to be dependent from independent claim 8.

Allowable Subject Matter

- 2. Claims 1-3, 5-11, 14, 16, 18-37 are allowed.
- 3. The following is a statement of reasons for the indication of allowable subject matter:

Regarding **claims 1** and **22**, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest that in order to allow the plural driving means to be driven at the same time, the plural driving means have a start signal input section for starting the plural driving means.

Akimoto, US Patent 5,144,447, discloses an area sensor (Fig. 2) comprising: plural pixels (Fig. 2), each having a switching element (Fig. 2: 4), arranged two-dimensionally; and plural common lines (Fig. 2: 5) which are connected to said

Application/Control Number: 09/748,219

Art Unit: 2612

switching elements corresponding to said pixels which are arrayed in a direction, a control signal being applied to said common line in order to drive said switching element, wherein plural driving means (Fig. 2: YDC and YDC2) for applying said control signal are connected to said common lines (Col. 4, line 67 – col. 5, line 31). However, Akimoto fails to teach or reasonably suggest that in order to allow the plural driving means to be driven at the same time, the plural driving means have a start signal input section for starting the plural driving means.

Regarding **claims 8**, **9** and **25**, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest that the signal reading is performed, at the same timing, by the plural signal reading means.

Takemoto, US Patent 4,621,291, discloses a an area sensor (Figs. 2, 5 and 7) comprising: plural pixels, each having a switching transistor (Fig. 2: 25) and a photoelectric conversion element (Fig. 2: 24), arranged two-dimensionally; and plural common source lines (Fig. 2: 26) which are connected to the source electrodes of said switching transistors which are arrayed in a direction, wherein plural signal reading means (Fig. 2: 22A and 22B) are connected to said common source lines (Col. 2, lines 5-21; col. 4, lines 43-66). Todaka, US Patent 4,835,617, teaches an image pickup device wherein a common line (Fig. 3: 133) is connected to the gate of the of the switching transistors (Fig. 3: 135) and said common lines are connected to a vertical scanning circuit (Fig. 3: 111) and an auxiliary vertical scanning circuit (Fig. 3: 211) in order to effect the reading and resetting by the separate scanning circuits (Col. 4, lines 9-60; col. 7, lines 52-56). However, Takemoto and Todaka, either in combination or

Application/Control Number: 09/748,219

Art Unit: 2612

alone, fail to teach or reasonably suggest that the signal reading is performed, at the

same timing, by the plural signal reading means.

Contact

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Nelson D. Hernandez whose telephone number is (571)

272-7311. The examiner can normally be reached on 8:00 A.M. to 5:30 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Wendy R. Garber can be reached on (571) 272-7308. The fax phone

number for the organization where this application or proceeding is assigned is 703-

872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
